## PROJECT REPORT

## Of

## INCENSE STICKS (AGARBATTI)

## PURPOSE OF THE DOCUMENT

This particular pre-feasibility is regarding Incense Sticks (Agarbatti)

The objective of the pre-feasibility report is primarily to facilitate potential entrepreneurs in project identification for investment and in order to serve his objective; the document covers various aspects of the project concept development, start-up, marketing, finance and management.
[We can modify the project capacity and project cost as per your requirement. We can also prepare project report on any subject as per your requirement.]

## PROJ ECT AT A GLANCE

1 Name of the Entreprenuer $\mathbf{X X X X X X X}$

## Agarbatti (incense sticks) Manufacturing

## Brief Details:

The burning of incense in religious and social functions has been practiced in India since early times. Dhup an aromatic powder or paste is burnt in Indian homes as a fragrant fumigant and is reputed to possess insecticidal and antiseptic properties. Agarbattis are obtainable in different colors and with different perfumes. The burning time; of an agarbatti varies from 15 minutes to 3 hours according to quality and size. Agarbatti is also obtainable in other forms such as dashang (stickly paste or powder) deep (cones and Dhup, tablets etc.).

About $75 \%$ of the agarbattis manufactured are of cheap quality containing only charcoal powder or low quality sandal wood powder with a mixture of $50 \%$ of "wood gun" powder. Cheap perfumes are used to give them a top note. In superior varieties, essential oils, purified resins, natural fixatives like amber, musk and civet are used along with synthetic aromatics.

## Market:

Agarbatti Industry is one of the labour intensive cottage types of traditional industries in Moreover; it is an export-oriented industry also. In fact, this is one the items considered for boosting exports. Owing to the low level of technology involved in this industry, this can be taken to rural /urban areas without much difficulty.

The entire production of the unit is presently supplied to resellers at Lucknow.However the firm is planning to establish own brand and start direct marketing to earn more profits.

## Capacity:

The proposed unit shall work for single shift of 10 hours per day for 300 working days per annum. Though some of the operations are to be mechanized the overall productivity will depend on product mix and skills of operators. The machine processes 60 Kg of raw material in 10 hrs

## Process:

All the ingredients in powder form are mixed well in the proper proportion with water to a semi solid paste. This paste is applied to bamboo sticks and rolled on wooden-planks with hands uniformly. The raw sticks are then dried and packed in suitable bundles. For manufacture of perfumed agarbattis the concentrated perfume is diluted first with white oil or diethyl phthalate (Generally 1:3) and raw agarbattis are dipped suitably in dipping trays. The perfumed batties are packed immediately in butter paper bags or polypropylene bags and finally in cartons.

A typical composition for masala batties is as under:

- White chips - $40 \%$
- Gigatu-20\% The composition can be modified
- Charcoal - $20 \%$ according to the requirements
- Aromatic chemical Essential-20\%
- Oil and other ingredients

## Machinery \& Equipment

The proponent has 5 Agarbatti making machines and accessories purchased from own sources .For expansion of the unit the firm shall purchase plant and Machineries worth Rs.5.70Lacs as detailed hereunder which is based on quotation:

| Name of Machinery | Qty. | Value <br> (in lac) |
| :--- | :---: | :---: |
| High speed automatic agarbatti making <br> machine | 01 | 1.45 |
| Automatic Dhoopbatti making machine | 02 | 2.70 |
| Powder mixing machine | 01 | 0.30 |
| Other accessories, tools etc |  | 0.31 |
| Packing ,GST etc |  | 0.94 |
| Total |  | $\mathbf{5 . 7 0}$ |
