## PROJECT REPORT

## OF

## CERAMIC PAINTS MANUFACTURING UNIT

## PURPOSE OF THE DOCUMENT

This particular pre-feasibility is regarding Ceramic Paints Manufacturing unit.

The objective of the pre-feasibility report is primarily to facilitate potential entrepreneurs in project identification for investment and in order to serve his objective; the document covers various aspects of the project concept development, start-up, marketing, finance and management.
[We can modify the project capacity and project cost as per your requirement. We can also prepare project report on any subject as per your requirement.]

## PROJECT AT A GLANCE

1 Name of the Entreprenuer

2 Constitution (legal Status) :

3 Father / Spouse Name
4 Unit Address

5 Product and By Product

6 Name of the project / business activity proposed :
7 Cost of Project
8 Means of Finance
Term Loan
Own Capital
Working Capital
9 Debt Service Coverage Ratio
10 Pay Back Period
11 Project Implementation Period
12 Break Even Point

13 Employment
14 Power Requirement
15 Major Raw materials
16 Estimated Annual Sales Turnover

17 Detailed Cost of Project \& Means of Finance

COST OF PROJECT

| Particulars | (Rs. In Lakhs) |
| :--- | ---: |
| Land | Own/Rented |
| Plant \& Machinery | 17.23 |
| Miss Assets | 1.00 |
| Furniture \& Fixtures | - |
| Working Capital | 5.40 |
| Total | $\mathbf{2 3 . 6 3}$ |

## MEANS OF FINANCE

| Particulars | Amount |
| :--- | ---: |
| Own Contribution | 2.36 |
| Working Capital(Finance) | 4.86 |
| Term Loan | 16.41 |
| Total | $\mathbf{2 3 . 6 3}$ |

## 1. INTRODUCTION

Ceramic Paints are a new generation of paints that contain very less amounts of VOCs and hence a healthy alternative to the other traditional types of paints. These paints over protection against the harmful rays of the sun and made in a way so as to last longer than regular paints. These paints, being devoid of VOCs are safe to be used around children. Being more durable than the other paints, these paints are often more costly than the other paints. Despite this factor, there are several advantages that are associated with the use of the ceramic-based paints. These paints create thicker and smoother wall finishes which are easier to clean than the regular paints. These paints can even withstand scrubbing without losing any sheen.

These paints contain "Ceramic Microspheres" or "Microbeads" which are used as Paint Extenders. Traditionally, the Paint Extenders are made up of inorganic materials like Chalk, Clay, Talc, Barytes, Titanium Dioxide, etc. The problem with using these extenders is the jaggedness within the material that results in rougher finish. On the other hand, the beads in the ceramic paints, however small they might be are packed closer together and hence result in smoother finishes. Furthermore, it enables the paint to withstand harsh temperature conditions and also the growth of moss, mildew, and bacteria.

## 2. USES \& MARKET POTENTIAL:

Some of the most common uses of the Ceramic paints can be listed as below:

1. This paint can be used to paints the exterior and the interior surfaces of commercial places as well as personal homes.
2. It provides a beautiful sheen to the walls
3. It is useful is protecting the walls against the UV rays of the sun thus it does not fade easily.
4. The paint is also successful against molds and fungal growth on the walls.
5. It is protective against different kinds of stains such as ketchup, lipstick, crayons, etc.

The global Paints and Coatings industry generates a revenue of almost 160 Billion US Dollars, while the Indian Paints Industry is valued at 7.1 Billion US Dollars as per the Fiscal Year 2020. The domestic paints industry has grown at a rate of 10.4 \% from the year 2008 when the market was valued at Rs. 159 Billion to the year 2020 when the market has reached Rs. 520 Billion Dollars. Over the years, the decorative paints industry has grown at a CAGR of CAGR of $11.4 \%$ against the Industrial Paints sector which has grown at a CAGR of $7.9 \%$.

The Paints industries in India can be divided into two sectors: Decorative and Industrial Paints. The decorative paints consists of Interior paints/ Enamels/ Emulsions, Exterior paints/ Enamels/ Emulsions, Distemper, Putty, Wood coatings, Cement paints, Primers and Thinners. On the other hand, the Industrial Paints sectors can be divided into General Industrial paints, Automotive coating, Protective coating, Powder coating, Glass coating, Pipe coating, Niche segments such as coal, marine, refinish coatings, etc.

There are several factors that have contributed to the faster growth of the Decorative paints sector that include: (a) Rapid scale of urbanization and the increase in the nucleation of the families, (b) Rising disposable income, (c) Reduction in the repainting cycle, (d) Government boost for housing scheme, (e) Upgradation and growth of top-end products and (f) Slowdown in the auto industry and infrastructure development in the recent years.

MANUFACTURING PROCESS

## 3. PROJECT COMPONENTS

### 3.1 Land \& Building

The land required for this manufacturing unit will be approx. around 2000 square feet. Land Purchase and Building Civil Work Cost have not been considered as part of the cost of project. It is expected that the premises will be on rental and approximate rentals assumed of the same will be Rs.30,000 per month.

### 3.2 Plant and Machinery

| Machine | Quantity | Price |
| :--- | :---: | :---: |
| Dissolver machine | 1 | 60,000 |
| Sand Mill Machine | 1 | $5,00,000$ |
| High-Speed Dispersion tank | 1 | $5,00,000$ |
| Electronic weighing machine | 1 | 50,000 |
| Paints filtering machine | 1 | $1,00,000$ |
| Brook field Viscometer, | 1 | 98,000 |
| LCV model | 1 | 65,000 |
| Wet scrub abrasion tester | 1 | 50,000 |
| Demineralized Water plant | 1 | $3,00,000$ |
| Paints filling plant |  | $\mathbf{1 7 , 2 3 , 0 0 0}$ |
| TOTAL |  |  |

Note: Total Machinery cost shall be Rs 17.23 lakhs (Approx.) including GST and Transportation Cost.

### 3.3 Power Requirement

The borrower shall require power load of 40 KW which shall be applied with Power Corporation. However, for standby power arrangement the borrower shall also purchase DG Set.

### 3.4 Manpower Requirement

The total manpower required for the operation of Ceramic Paint Manufacturing Unit is about 8-12.

## 4. FINANCIALS
