## FOAM MATTRESS

Introduction: A mattress is a large pad for supporting the reclining body, used as or on a bed. Mattresses may consist of a quilted or similarly fastened case, usually of heavy cloth, that contains hair, straw, cotton, foam rubber, etc.; a framework of metal springs; or they may be inflatable. Mattresses are usually placed on top of a bed base which may be solid, as in the case of a platform bed, or elastic, e.g. with an upholstered wood and wire box spring or a slatted foundation. Foam mattresses rely on air trapped within aerated substances (rather than springs) to offer support and bounce. Foam mattresses generally consist of three broad types: polyurethane foam, memory foam, and foam latex.

Benefits \& Market Potential: Various benefits are

- Reduce pressure points
- Reduce dust mites
- Prevent motion disruption
- Support different sleep positions

India's overall mattress market has grown at a CAGR of above 11\% over the last five years. The unorganised sector primarily dominated the Indian mattress market, but with increasing, awareness and an increase in the earning capability of consumers helped in the growth of the organised industry which has grown nearly at a CAGR of 17\% in last five years. In India, with rise in population, the numbers of households are also increasing. Rise in number of households are increasing the demand for memory foam mattress in India.

Machinery Requirements: Basic machines \& equipments are as follows:

| S No. | Machine | Unit | Price |
