## PROJECT REPORT

## Of

## SUGAR CANDY

## PURPOSE OF THE DOCUM ENT

This particular pre-feasibility is regarding Sugar Candy Making Unit

The objective of the pre-feasibility report is primarily to facilitate potential entrepreneurs in project identification for investment and in order to serve his objective; the document covers various aspects of the project concept development, start-up, marketing, finance and management.
[We can modify the project capacity and project cost as per your requirement. We can also prepare project report on any subject as per your requirement.]

## PROJECT AT A GLANCE

## INTRODUCTION

Candy or Sweet is the most popular type of confectionery over the world, and there is certainly something about this unique product that holds many mysterious qualities. Candy is made by dissolving sugar in water or milk to form a syrup, which is boiled until it reaches the desired concentration or starts to caramelize. Candy comes in a wide variety of textures, from soft and chewy to hard and brittle.

Hard candies, also known as lollipops follies, suckers, or boiled sweets, are generally made of sucrose, glucose, water, colour and flavour. Hard candies have retained their market share, especially with children, even with the proliferation of new candy varieties. Hard candy formulated with functional ingredients represents a growth opportunity for the adult consumer sector in products like lozenges and other nutraceuticals.
Candy is usually liked by all age groups of people as a confectionery. As a snack between meals - particularly at special occasions like parties or Christmas. The candy are used after meal, dinners as smooth refresher. It drives away bad smell from mouth and refreshes the breath. Sometimes it causes good sensation while chewing. It is chewed by children, young people, young girls, young ladies etc. But mostly it is consumed by children's of age group below ten.

## MARKET ANALYSIS

Candy market in India is anticipated to grow at a CAGR of over 9\% during coming years. on account of rising middle class households, coupled with increasing working as well as youth population. The most dominant segment in the country's candy market is sugar candy.

Rapid modernization, continuously rising innovative and premium product launches, growing e-commerce market coupled with expanding organized retail channels and synchronized distribution networks are projected to drive candy market in India in the coming years.

Major cities in India, such as Delhi/NCR, Mumbai, Hyderabad, Bengaluru, Chandigarh, Chennai, and Kolkata are among the leading demand generators of candies in the country. With increasing economic development in the country, lifestyle and preference of consumers is also significantly changing in Tier I and Tier II cities, which is driving candy consumption across these cities. Moreover, demand for sugar-free and low calorie candy products is also growing on account of increasing health awareness among consumers across the country.

The sugar candy segment is expected to maintain its dominance due to continuing launch of innovative products as well as aggressive branding initiatives undertaken by leading market players. Preference for premium chocolate candies as gifts on festivals and functions is also growing considerably across the country due to increasing marketing initiatives to position chocolate candies as a product of indulgence rather than impulse product. In 2015, organized sector accounted for a majority share in India candy market; and the segment's dominance is expected to further increase in coming years.

## MANUFACTURING PROCESS

The process start with weighing of all ingredients like: sugar, liquid glucose, citric acid, food additives, flavors, etc. which are mixed thoroughly and cooked in a vacuum cookers to process at required temperature. The mass can transfer from mixer to cooker by pump and cooked mass then pumped on depositor, molding machine or forming as applicable which are then deposited, molded or formed in required shapes and sizes by making ropes or as per applicable process with or without center filling. Thus prepared confections are cooled and packed either in pillow packing machine or double twist wrapper machine as required.
