## PROJECT REPORT

## Of

## ELECTRICAL SWITCH

## PURPOSE OF THE DOCUMENT

This particular pre-feasibility is regarding Switch Manufacturing unit.

The objective of the pre-feasibility report is primarily to facilitate potential entrepreneurs in project identification for investment and in order to serve his objective; the document covers various aspects of the project concept development, start-up, marketing, finance and management.
[We can modify the project capacity and project cost as per your requirement. We can also prepare project report on any subject as per your requirement.]

PROJECT AT A GLANCE

## SWITCH MANUFACTURING UNIT

## Introduction:

Electrical switches are household consumables items. A switch is an electrical component that can break an electrical circuit, interrupting the current or diverting it from one conductor to another. When the switch is open, the electrical contacts do not touch and electricity cannot flow. When the switch is closed, however, the electrical contacts touch and electricity flows throughout the circuit. In almost every application, for residential, commercial or industrial use, switches are required to be installed. Electrical switches are used to perform all the electrical functions. From a fan to bulb, every electrical equipment we use in our day to day life is useless without a switch. Switch is an electrical component which can make or break electrical circuit automatically or manually. Switch is mainly works with ON (open) and OFF (closed) mechanism. Numerous circuits hold switches that control how the circuit works or actuate different characteristics of the circuit. The classification of switches depends on the connection they make. SPST (Single Pole Single throw), SPDT (single pole double throw), DPST (double pole, single throw), DPDT (double pole double throw). There are different types of electrical switches are available for different types of applications.

## Uses \& Market Potential:

Electrical switches are used in aerospace, chemical, marine, medical, communication, military, automotive, petrochemical, and transportation-as well as in the commercial and residential sectors. Switches are used in electrical and mechanical product.

Disengage Switch market is relied upon to develop from an expected USD 9.07 Billion of every 2015 to USD 12.66 Billion by 2020, at a CAGR of $6.9 \%$ from 2015 to 2020 across the globe. Regarding the arrangement section, Traditional Electrical Switches market represented more than $80.37 \%$ of the general offer in 2016, and Smart Electrical Switches represented more than 19.63\%. It is normal that Smart Electrical Switches will represent more than $22.58 \%$ in 2021.According to WMJ the overall market for Electrical Switches is relied upon to develop at a CAGR of generally $1.0 \%$ throughout the following five years, will arrive at 3860 million USD in 2024, from 3630 million USD in 2019, as per another investigation. As indicated by an examination, non-melded separate switches to enlist the most noteworthy development in next five years. This high development is significantly determined by Asia-Pacific locale which has quick industrialization in two of the quickest developing economies, China, and India.

## Product:

Electrical Switch

## Raw Material:

Basic raw material are Plastic and metal parts.

## Manufacturing Process:

## Area:

The industrial setup requires space for Inventory, workshop or manufacturing area, space for power supply utilities and polishing area. Also, some of the area of building is required for office staff facilities, office furniture, etc. Thus, the approximate total area required for complete industrial setup is $1200-1800$ Sqft.

## Cost of Machines:

| Machine | Unit | Rate | Price |
| :--- | :--- | :--- | :--- |
| Injection Moulding Machine | 1 | 1200000 | 1250000 |
| Polishing or buffing machine | 1 | 50000 | 50000 |
| Moulds | - | 50000 | 50000 |
| Testing equipment's and other tools | - | 50000 | 50000 |
| Total Amount |  |  | $\mathbf{1 4 0 0 0 0 0}$ |

Power Requirement- The estimated Power requirement is taken at 25 HP.

Manpower Requirement-Following manpower is required:

- Machine operator-2
- Skilled/unskilled worker-3
- Helper-4
- Manager cum Accountant-1
- Sales Personnel-1

## Assumptions:

1. Production Capacity of Switch Manufacturing unit is taken at 2000 Units per day. First year, Capacity has been taken @ 45\%.
2. Working shift of 10 hours per day has been considered.
3. Raw Material stock and Finished goods closing stock has been taken for 15 days.
4. Credit period to Sundry Debtors has been given for 14 days.
5. Credit period by the Sundry Creditors has been provided for 15 days.
6. Depreciation and Income tax has been taken as per the Income tax Act,1961.
7. Interest on working Capital Loan and Term loan has been taken at $11 \%$.
8. Salary and wages rates are taken as per the Current Market Scenario.
9. Power Consumption has been taken at 25 HP.
10. Selling Prices \& Raw material costing has been increased by $3 \%$ \& $2 \%$ respectively in the subsequent years.
