## PROJECT REPORT

## Of

## PACKAGING UNIT

## PURPOSE OF THE DOCUMENT

This particular pre-feasibility is regarding Packaging Unit.

The objective of the pre-feasibility report is primarily to facilitate potential entrepreneurs in project identification for investment and in order to serve his objective; the document covers various aspects of the project concept development, start-up, marketing, finance and management.
[We can modify the project capacity and project cost as per your requirement. We can also prepare project report on any subject as per your requirement.]

## PACKAGING UNIT

## Introduction

Packaging Unit is a unit of measure that is used as packaging for a material. Wafer packaging paper are liquid resistant and offered in variety of patters. These can be used for regular purpose and manufactured to meet the requirements of the clients. They are designed in variegated patterns and following the latent trends to satisfy the end user.

## Use

A packaging unit can contain the product itself, (for example, a packet) or hold other packaging units, (for example, a box containing bottles).
You can print specific labels for a material for each packaging unit specified and enter the following information:

- Label size
- Generation variant
- Number of labels per packaging unit
- Validity area

Transport packaging together with its labels could look like this:

## Quality

Packing paper quality depends on the intended use. Packing paper is classified using the following quality features:

- Tensile strength
- Bursting strength
- Crease resistance
- Abrasion resistance
- Elasticity
- Stiffness
- Printability
- Wet strength
- Water repellency
- Impermeability to aromas and water vapour

## Packaging unit Market Analysis

- The Indian packaging industry itself is growing at 14-15\% annually. This growth rate is expected to double in the next two years.
- According to the Indian Packaging Institute, Indian Packaging industry is USD 14 billion and growing at more than $15 \%$ p.a. These figures indicate towards a change in the industrial and consumer set up.

The growth in the packaging industry in India is mainly driven by the food and the pharmaceutical packaging sectors. The large and growing Indian middle class, along with the growth in organized retailing in the country are fueling growth in the packaging industry. Another factor, which has provided substantial stimulus to the packaging machinery industry is the rapid growth of exports, which requires superior packaging standards for the international market. With this the need for adopting better packaging methods, materials and machinery to ensure quality has become very important for Indian businesses.

The Indian packaging industry is dominated by plastic flexible packaging. The traditional rigid packaging users have also been seen to shift to flexible packaging in recent times. According to industry sources, the main reasons for this is that flexible packages are found aesthetically attractive, cost-effective and sturdy. Consumer preference for the use of convenient packaging and packaged products in affordable quantities in laminates is also one of the main reasons that have contributed to the growth of flexible packaging in India. The food-processing sector is the largest user of flexible packaging, accounting for more than 50 percent of the total demand. The flexible packaging segment is estimated to be growing at over 35 percent annually. Major players in the flexible packaging sector are Paper Products Ltd. and Flex Industries.

## Manufacturing Process

The first step in pouch packaging is ordering or creating your pouches. Depending on what you're packing and what machine you're using, you may want to use anything from small, 2-inch pouches up to large, 250 mm pouches.

Pouch packaging provides a convenient, easy way to carry a snack, or even consumer goods. The product takes up less space as it's used up, which helps maximize pantry or workshop space. You're your customer is done using it, it takes up less space in their trash, saving them trash bags and trips to the curb.

## Machinery \& Equipment's required:

| Name | Cost |
| :--- | :---: |
| Fully Automatic single Head filling Machine <br> with double vibrator and chute bagger | $3,50,000$ |
| GST @ 18\% | 63,000 |
| Total | $4,13,000$ |

Cost of the machine is other than transportation cost.

## Land \&Building required:

Land required 500 Square Feet (approx.)
Approximate construction cost for the same is Rs. 100000

## Labour Requirement:

2 Manpower are required for the Packaging unit.
Includes:
1 skilled Labour
1 Unskilled Labour

## Raw Material Requirement

Packaging roll is required as raw material for Wafer \& Kurkure packet.
Average raw material (cost per KG): Rs. 250-300

## Packaging unit license \&registration

## For Proprietor:

- Obtain the GST registration.
- Fire/ Pollution Registration as required.
- Choice of a Brand Name of the product and secure the name with Trademark if required.

## Implementation Schedule

| S.N. | Activity | Time Required <br> (in Months) |
| :---: | :--- | :---: |
| 1 | Acquisition Of premises | 1 |
| 2 | Construction (if Applicable) | $1-2$ Months |
| 3 | Procurement \& installation of Plant \& Machinery | 1 |
| 4 | Arrangement of Finance | 1 |
| 5 | Requirement of required Manpower | 1 |
|  | Total time Required (some activities shall run <br> concurrently) | $2-3$ Months |

## Conclusion:

It can be used to pack items like potato chips, snacks, etc. This machine can be installed with low investment \& one can earn a good Margin of profit by doing this business.

## FINANCIAL ASSISTANCE REQUIRED

Term Loan of Rs 3.92 Lacs and Working Capital limit of Rs. 2.50 Lacs
